Do you think you've discovered an error in this book? Please check the list of errata below to see if we've already addressed the error. If not, please submit the error via our [Errata Form](#). We will attempt to verify your error; if you're right, we will post a correction below.

| Chapter | Page | Details | Date | Print Run |
|---------|----------|---|------------|-----------|
| | xxvi | Error in Text Line 6: "Once you've learned how OOP works in C#," Should say learned instead of leaned. | 06/02/2010 | |
| | 51 | Error in Text After the following statement: Similarly, you can gain control over operator precedence by using parentheses, as shown in this example This example should be included: var1 = (var2 + var3) * var4; Here, the content of the parentheses is evaluated first, meaning that the + operator acts before the * operator. | 5/5/10 | |
| | 54 | Error in Text Last paragraph, last sentence reads: "The other two namespaces..." should read: "The other three namespaces..." | 3/14/11 | |
| 5 | 122-962 | Error in Exercise Exercise 4: Currently reads: Will the following code compile? Why or why not? string[5] blab = new string[5] string[5] = 5th string. For the answers [Page 962] the code needs to be changed to: Will the following code compile? Why or why not? string[5] blab = new string[5] blab[5] = 5th string. | 3/14/11 | |
| | 138 | Error in Figure output shown should not include the line "Text output from function" | 3/14/11 | |
| | 242 | Error in Text CURRENTLY READS: "The last two of these can be combined, so protected internal members are also possible. These are only accessible from code-derived classes within the project (more accurately, the assembly)." SHOULD READ: "The last two of these can be combined, so protected internal members are also possible. These are accessible from code-derived classes and from code within the project (more accurately, the assembly)." | 02/20/2013 | |
| | 282 | Error in Text Middle of page. "You'll learn cover" - Should say "You'll learn?" | 4/11/2011 | |
| | 295 | Error in Code ?if (min < 2)? should be ?if (minimum < 2)? | 4/11/2011 | |
| | 301, 321 | Errata Pages 301 and 321 reference the ?as? operator which is not covered until page 326. Please refer to page 326 for this coverage. | 4/11/2011 | |
| | 314 | Error in Code In GetHashCode(). Formula should be 13*(int)suit + (int)rank? | 4/11/2011 | |
| | 336 | Error in Text "tertiary" should be "ternary" | 12/7/2010 | |
| | 354 | Error in Code Code sample near the bottom of the page: class MyGenericClass where T: constraint should be: class MyGenericClass where T: constraint | 10/5/2010 | |
| | 380 | Error in Text In paragraph 7, in reference to the command from the previous Try it Out: | 12/27/2012 | |

| | | |
|-----|--|------------|
| | Currently reads: Console.ReadLine() | |
| | Should read: Console.ReadKey() | |
| 394 | Improvement on Code Last line of the Program.cs code should be: Console.ReadKey(); This should occur after the Console.WriteLine command indicating that the player "has won the game" or this message will display too quickly to the user and not be readable. | 3/14/11 |
| 462 | Error in Text Last full sentence at bottom of the page: "If the length of the text in the text box is zero, then set the background color to red and the Tag to false." should be: "If the length of the text in the text box is zero, then set the background color to red." No Tag property is used in the coding example. | 3/14/11 |
| 467 | Error in Text Step # 3 of the Try It Out: "The Text property of the RadioButton and CheckBox controls should be the same as the names of the controls without the first three letters..." should be: "The Text property of the RadioButton and CheckBox controls should be the same as the names of the controls without the first two words..." | 3/14/11 |
| 502 | Error in Text Third sentence, just before the Try It Out: "In the code download, this project is named 'Extended Manual Menus'." should be: "In the code download, this project is named 'Manual Menus 2'." | 3/14/11 |
| 506 | Error in Table In the second table, the first value is: MS Sans Serif Times New Roman Those two font names should be listed (and entered) on separate lines: MS Sans Serif Times New Roman | 12/27/2012 |
| 514 | Error in Code Step 5 code: "frmChild child = new frmChild(this);" should be changed to: "frmChild child = new frmChild(this);" | 3/14/11 |
| 515 | Error in Code code in middle of page: "frmChild child = new frmChild(this);" should be changed to: "frmChild child = new frmChild(this);" | 3/14/11 |
| 516 | Extraneous Sentence second sentence of step 5: "Change the AllowMerge property of the toolbar to False." Setting the value of AllowMerge to either true or false in this example has no effect. Ignore the sentence. | 9/9/11 |
| 521 | Error in Code Step 4 code: "private void ToolStripMenuItemTile_Click(object sender, EventArgs e) " and "private void ToolStripMenuItemCascade_Click(object sender, EventArgs e) " should be: "private void tileToolStripMenuItem_Click(object sender, EventArgs e) " and "private void cascadeToolStripMenuItem_Click(object sender, EventArgs e) " respectively, to be consistent with the naming convention for these menu items as found in Step 2. | 3/14 |
| 554 | Error in Text second sentence: "When you click the Settings button near the Prerequisites URL text box..." should be: "When you click the Prerequisites button near the Installation URL text box..." | 3/14/11 |
| 585 | Error in Text 4th sentence: "This base code is in the code-behind file Registration.aspx.cs, as defined with the CodeFile property." should be: "This base code is in the code-behind file Registration.aspx.cs, as defined with the CodeBehind property." | 3/14/11 |
| 591 | Error in Text Step 6 of Try It Out exercise: "6. Start the Default.aspx page, fill in some data..." should be changed to "6. Start the Registration.aspx page, fill in some data..." | 4/11/2011 |
| 593 | Error in Text Currently says: 2. Add a new AJAX Web Form named UpdatePanelDemo.aspx to the existing website. 3. From the AJAX Extensions category in the Toolbox, add an UpdatePanel to the page. This should be: 2. Add a new WebForm named UpdatePanelDemo.aspx to the existing website. 3. From the AJAX Extensions category in the Toolbox, add ScriptManager and UpdatePanel controls to the page. | 11/30/2010 |
| 594 | Error in Text Current: With an ASP.NET AJAX page, a ScriptManager object is required. This object is added by using the AJAX Web Form template. Should be: For using Ajax functionality, a ScriptManager object is required. | 11/30/2010 |
| 595 | Error in Text | 11/30/2010 |

| | | |
|-------------------------|--|------------|
| | <p>Currently says:</p> <ol style="list-style-type: none"> 2. Add a new AJAX Web Form named UpdatePanelWithTrigger.aspx to the existing website. 3. Add two UpdatePanel controls. <p>Should be:</p> <ol style="list-style-type: none"> 2. Add a new Web Form named UpdatePanelWithTrigger.aspx to the existing website. 3. Add one ScriptManager and two UpdatePanel controls | |
| 595 | <p>Error in Text</p> <p>Step 9 of TryIt Out, second sentence:</p> <p>"Add an AsynchronousPostBack trigger, set the..."</p> <p>should be changed to</p> <p>"Add an AsyncPostBack trigger, set the..."</p> | 4/11/2011 |
| Chapter 3 Exercise 4 | <p>Error in Code</p> <p>The *, %, and / operators have equal highest precedence here, followed by + and finally +=. The precedence in the exercise can be illustrated using parentheses as follows:</p> <pre>resultVar += (var1 * var2) + (var3 % (var4 / var5));</pre> <p>Or:</p> <pre>resultVar += (var1 * var2) + ((var3 % var4) / var5);</pre> <p>The result is the same in both cases.</p> | 05/20/2010 |
| 626 | <p>Error in Text</p> <p>In the TryIt Out, under point 2:</p> <p>open the window be selecting view->Other Windows->Server Explorer</p> <p>should be:</p> <p>open the window by selecting view->Server Explorer</p> | 10/18/11 |
| 642 | <p>Error in Text</p> <p>Last sentence in NOTE:</p> <p>"Chapter 27 covers WCF."</p> <p>should be changed to</p> <p>"Chapter 26 covers WCF."</p> | 4/11/2011 |
| 656 | <p>Error in Code</p> <p>Code should be</p> <pre>/// if (e.Error == null) { /// Instead of /// if (e.Error != null) { /// } }</pre> | 01/30/2011 |
| 659 | <p>Error in Text</p> <p>The properties City and TemperatureType in class GetWeatherRequest, and the properties Condition and Temperature in class GetWeatherResponse should not be terminated with a semicolon. A "Semicolon after method or accessor block is not valid" error will result.</p> | 4/11/2011 |
| 672 | <p>Error in Text</p> <p>Try It Out Step 2, first sentence: "Open the Package/Publish project settings..." should be changed to "Open the Package/Publish Web project settings..."</p> <p>Step 2, last sentence: "Click the link...the setting 'Include all Databases configured in Deploy SQL Tab'" should be changed to "Click the link...the setting 'Include all databases configured in Package/Publish SQL tab'"</p> <p>Step 3, first sentence: "The Deploy SQL settings..." should be changed to "The Package/Publish SQL settings..."</p> <p>Step 4, third sentence: "Check the settings of the publish method MSDeploy.Publish" should be changed to "Check the settings of the publish method Web Deploy"</p> <p>Step 4, fifth sentence: "Click the link Click Here to..." should be changed to "Click the link 'Find Web hosting provider that supports one-click publish' to..."</p> | 4/11/2011 |
| 673- 674 | <p>Error in Figures</p> <p>Figures 20-8, 20-9, 20-10, and 20-11 do not display the correct wording and need to be updated with the latest screens from the latest Visual Studio 2010 RC.</p> | 4/11/2011 |
| 701 | <p>Error in Code</p> <p>in How It Works code snippet, inside while loop:</p> <pre>strLine = sr.ReadLine();</pre> <p>should be:</p> <pre>line = sr.ReadLine();</pre> | 10/18/11 |
| 739 | <p>Error in Code</p> <p>P. 739, first line:</p> <p>"...parameter that is passed into the RecurseXmlDocument method..."</p> <p>should be changed to</p> <p>"...parameter that is passed into the FormatText method..."</p> | 4/11/2011 |
| 741 | <p>Error in Text</p> <p>Table 22-4, CreateElement description:</p> <p>"...creates only nodes of the XmlDocument variety."</p> <p>should be changed to</p> <p>"...creates only nodes of the XmlElement variety."</p> | 4/11/2011 |
| 745 | <p>Error in Text</p> <p>Last sentence before Table 22-6:</p> <p>"...you can assume the current node is the node in the XML document."</p> <p>should be changed to</p> <p>"...you can assume the current node is the node in the XML document."</p> | 4/11/2011 |
| 769 | <p>Error in Text</p> <p>Last sentence before How It Works:</p> <p>"Looks like the Rand() function generates..."</p> <p>should be changed to</p> <p>"Looks like the Random() function generates..."</p> | 4/11/2011 |
| 857 | <p>Error in Text</p> | 11/13/2011 |

The following statement should be removed from the third paragraph from the bottom:

?Window_MouseUp() event handler was called?
